FEATURED PROJECTS

AutoHeal AI — Autonomous CI/CD Diagnostics Platform	React, TypeScript, Express, Socket.IO, MongoDB
- Built full-stack platform for repo analysis, CI/CD failure detection and automated fix workflows, pinpointing affected lines via GitHub API. - Implemented real-time progress tracking from repo cloning to pipeline completion with React, TypeScript, Socket.IO, and MongoDB. - Configured Vercel and Docker/Railway deployments with shared types and environment-based configuration.	
OPDFlow AI — Government Hospital OPD Queue Command Center	React, TypeScript, Vite, Supabase, PostgreSQL
- Engineered an OPD queue platform with AI-assisted triage, priority-aware queues, digital QR passes, and real-time congestion management. - Implemented offline-first sync, multilingual accessibility, live display broadcast, wait-time forecasting, and Code Blue emergency workflows. - Designed intuitive patient and staff workflows with dynamic staff allocation and audit reporting.	
Anamnesis-AI — Multi-Agent Decision-Intelligence Platform	Next.js, FastAPI, LangGraph, Chart.js, Docker
- Built multi-agent application simulating alternate histories and scenarios across economy, society, governance, sustainability, and tech. - Designed orchestrator, domain, and critic agents with LangGraph, grounding reasoning in real-world datasets through retrieval. - Features risk and feasibility evaluation, structured impact reports, and retrieval-grounded reasoning.	
Cyber Fraud Detection Platform — Full-Stack ML System	FastAPI, ML, SQLAlchemy, React, Render, Vercel

- Built an end-to-end machine-learning platform for phone-number and behavioral risk analysis with a secure React frontend for real-time investigation.

Pack&Chew Website — Booking & Food Delivery Platform

Full-Stack Web, Live Tracking

- Bus and train ticket booking platform with integrated food services and live tracking.
